

## **Container Permits (Roll Off Dumpsters/Storage Pods) Information/Instructions**

---

1. Roll-off dumpsters/storage containers are only allowed on a public street if they first obtain a permit from the Engineering Division. Contact the Engineering Division for a permit. No permit is required for roll-off dumpsters/storage containers if they are located on the driveway or other private property.
2. A dumpster/storage container permit is required when placed on the street for a period of more than 24 hours and is effective up to 30 days, without a building permit and 180 days with an active building permit and may be renewed depending upon the discretion of the Traffic Engineer. A dumpster/storage container may not be placed until a permit is issued.
3. Dumpster/storage container should not exceed 160 square feet or 8ft in width.
4. Location of dumpster/storage container shall comply with the following criteria:
  - Dumpster/storage container 6ft in height or taller should not be placed*
    - A. Within thirty (30) feet of an intersection or crosswalk.
    - B. Within ten (10) feet of a public or private driveway.
  - Dumpster/storage container Less than 6ft in height should not be placed*
    - A. Within twenty (20) feet of an intersection or crosswalk.
    - B. Within five (5) feet of a public or private driveway.
  - All Dumpster/storage container in public right of way should not be placed*
    - C. Within fifteen (15) feet of a fire hydrant
    - D. Within thirty (30) feet of a flashing beacon signal, and stop or yield sign.
    - E. Within thirty (30) feet of a community mailbox
    - F. In location blocking storm drain inlet.
    - G. In locations where it will restrict sight distance for vehicles or pedestrians. Sight distance shall be in accordance with Broomfield Standards and Specifications.
    - H. In locations that partially or totally block any place of ingress or egress.
    - I. In a location that occupies or impedes a sidewalk, tree lawn, travel lane, no parking zone, temporary loading zone, or alley.
    - J. As determined by City Traffic Engineer
5. Loading material into the dumpster/storage container shall be such as to cause minimal disruption to the adjacent sidewalk, street or roadway and must be done to minimize noise and prevent dust.
6. Dumpsters/storage containers shall be properly and promptly emptied by the applicant, and under no circumstances shall the dumpster be filled beyond its rated capacity.
7. Each dumpster/storage container shall have reflectors placed on each side of the dumpster (minimum 4 inches in diameter) or temporary reflective traffic cones (minimum 36 inches) placed on each side.
